POU920010074US1 Source Code History Report

under a different name. This is necessary because there is already a CtSec library in development, and if we did not rename this one, the one being built in this directory would overwrite it, and suddenly clients using the "other" CtSec library would fail to compile, and we'd be in deep guano. These mods will be backed out later when the new CtSec library is ready to go live.
